Exploring the Islands

Exploring the Landscape

Exploring the Culture

The beauty of the Maldives is not only above the water. The Maldives is home to about five percent of the planet's reefs that comes with an explosion of color contributed by soft and hard corals that form them. The reefs are home to a thousand species of fish. Lured by the rich nutrients that flow in with the currents, large pelagic fishes such as manta rays and whale sharks also make the Maldives their home.

#### A Romantic Experience

Wake up to the rhythm of waves washing ashore in the Maldives. Your loved one by your side.
